

Your Weapons In The War Against Cyber Crime

ACTION ITEMS

Educate

Invest in your staff. It pays high dividends.

Educate users with cyber security awareness training. Ideally make it a mandatory part of their onboarding with your organisation, and keep the education going. Remember a human firewall is an integral part of your Cyber Security Strategy.

Passwords

Good password hygiene is a critical component of basic Cyber Security

- Never reuse the same username/password combination One Site = Unique Login
- Passwords a minimum of 16 characters with a little complexity
- Use a password manager (LastPass, 1Password etc)
- Use 2-Step Authentication/2SA/MFA wherever you can
- WiFi passwords are critical, access to your network can give access to your machines
- Read the first rule again and again!!

Secure Email

- Move away from consumer level email and ensure you have business grade
- Turn on all layers of defence
- Refer to action item 1 - EDUCATE on what to click and what to not click
- Control the devices email is accessed on

Do Your Updates

- Updates exist for a reason, don't delay them
- ALL DEVICES including mobile devices and IOT Devices
- Do regular company device update sessions to ensure everyone is current
